## Signed & ready for approval Q1 2018:

**White Arkitekter** – How do we use ICT for supporting the smart city?

**Fastighetsägarna i Stockholm** – Use drones for roof and facade inspection.

**Nobina Tech** – AUTOPILOTEN. Hardware and software layer.

## On the way in Q1 2018:

**SLL** – Will explore how future mobility in sustainable and connected cities can be developed.

**DigiNordix** – A LoRa WAN company that will provide open real time data. Hard- and software layer.

**Capgemini** – Interested in contributing & explore the Automagic City with partners & project owners. Business Model layer.

**Tele2** – Would like to develop and show case artistic and smart street lights. Hardware layer

**WSI** – Would like to bring startups to the testbed for development of smart hardware solutions.

**Smart Built Environment** – Would like to use the testbed for projects. Service layer

**Drive Sweden** – Would like to use the testbed for projects. Service layer

**Nobina Tech** – Would like to be a strategic part of the testbed. Hardware layer

**IVL** – Would like to be a part of the development of the sustainable and connected city. Business layer

**Stockholmsmässan** – Would like to be a part of the co-creation arena. Service layer

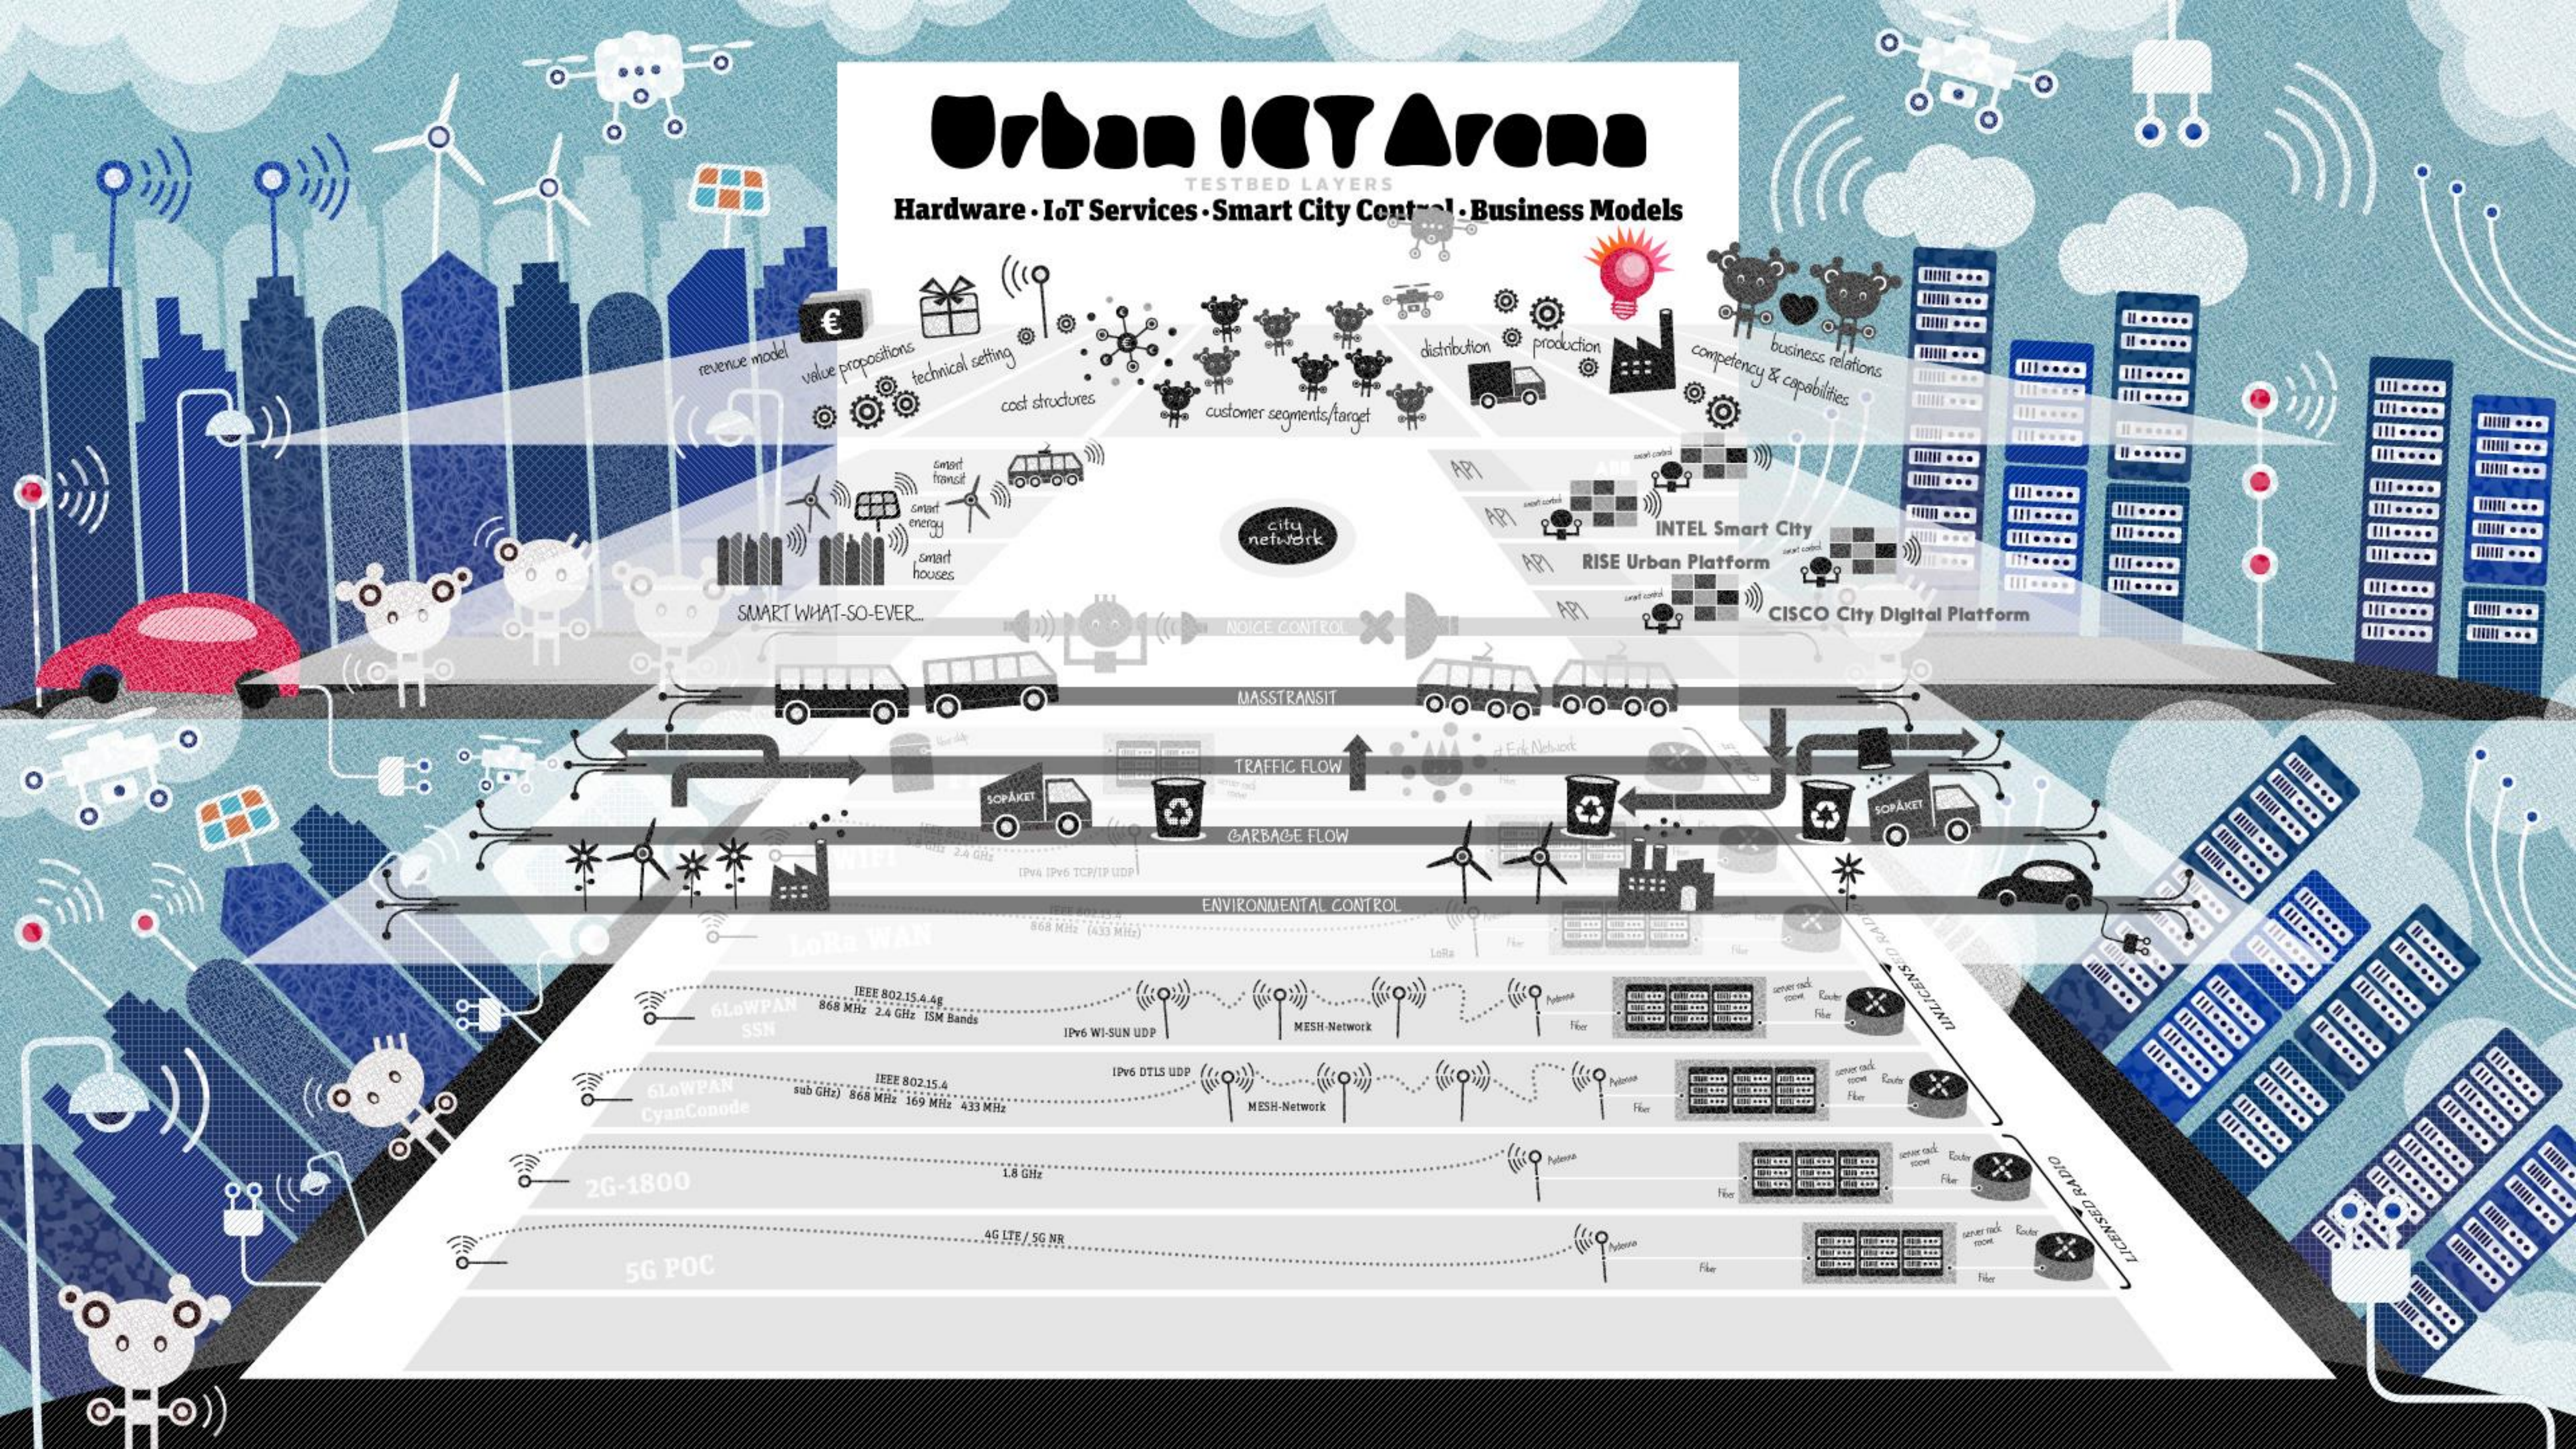

**IT & Telekomföretagen** – Would like to be a strategic partner and explore new business models.

# Urban ICT Arena

TESTBED LAYERS

## Hardware

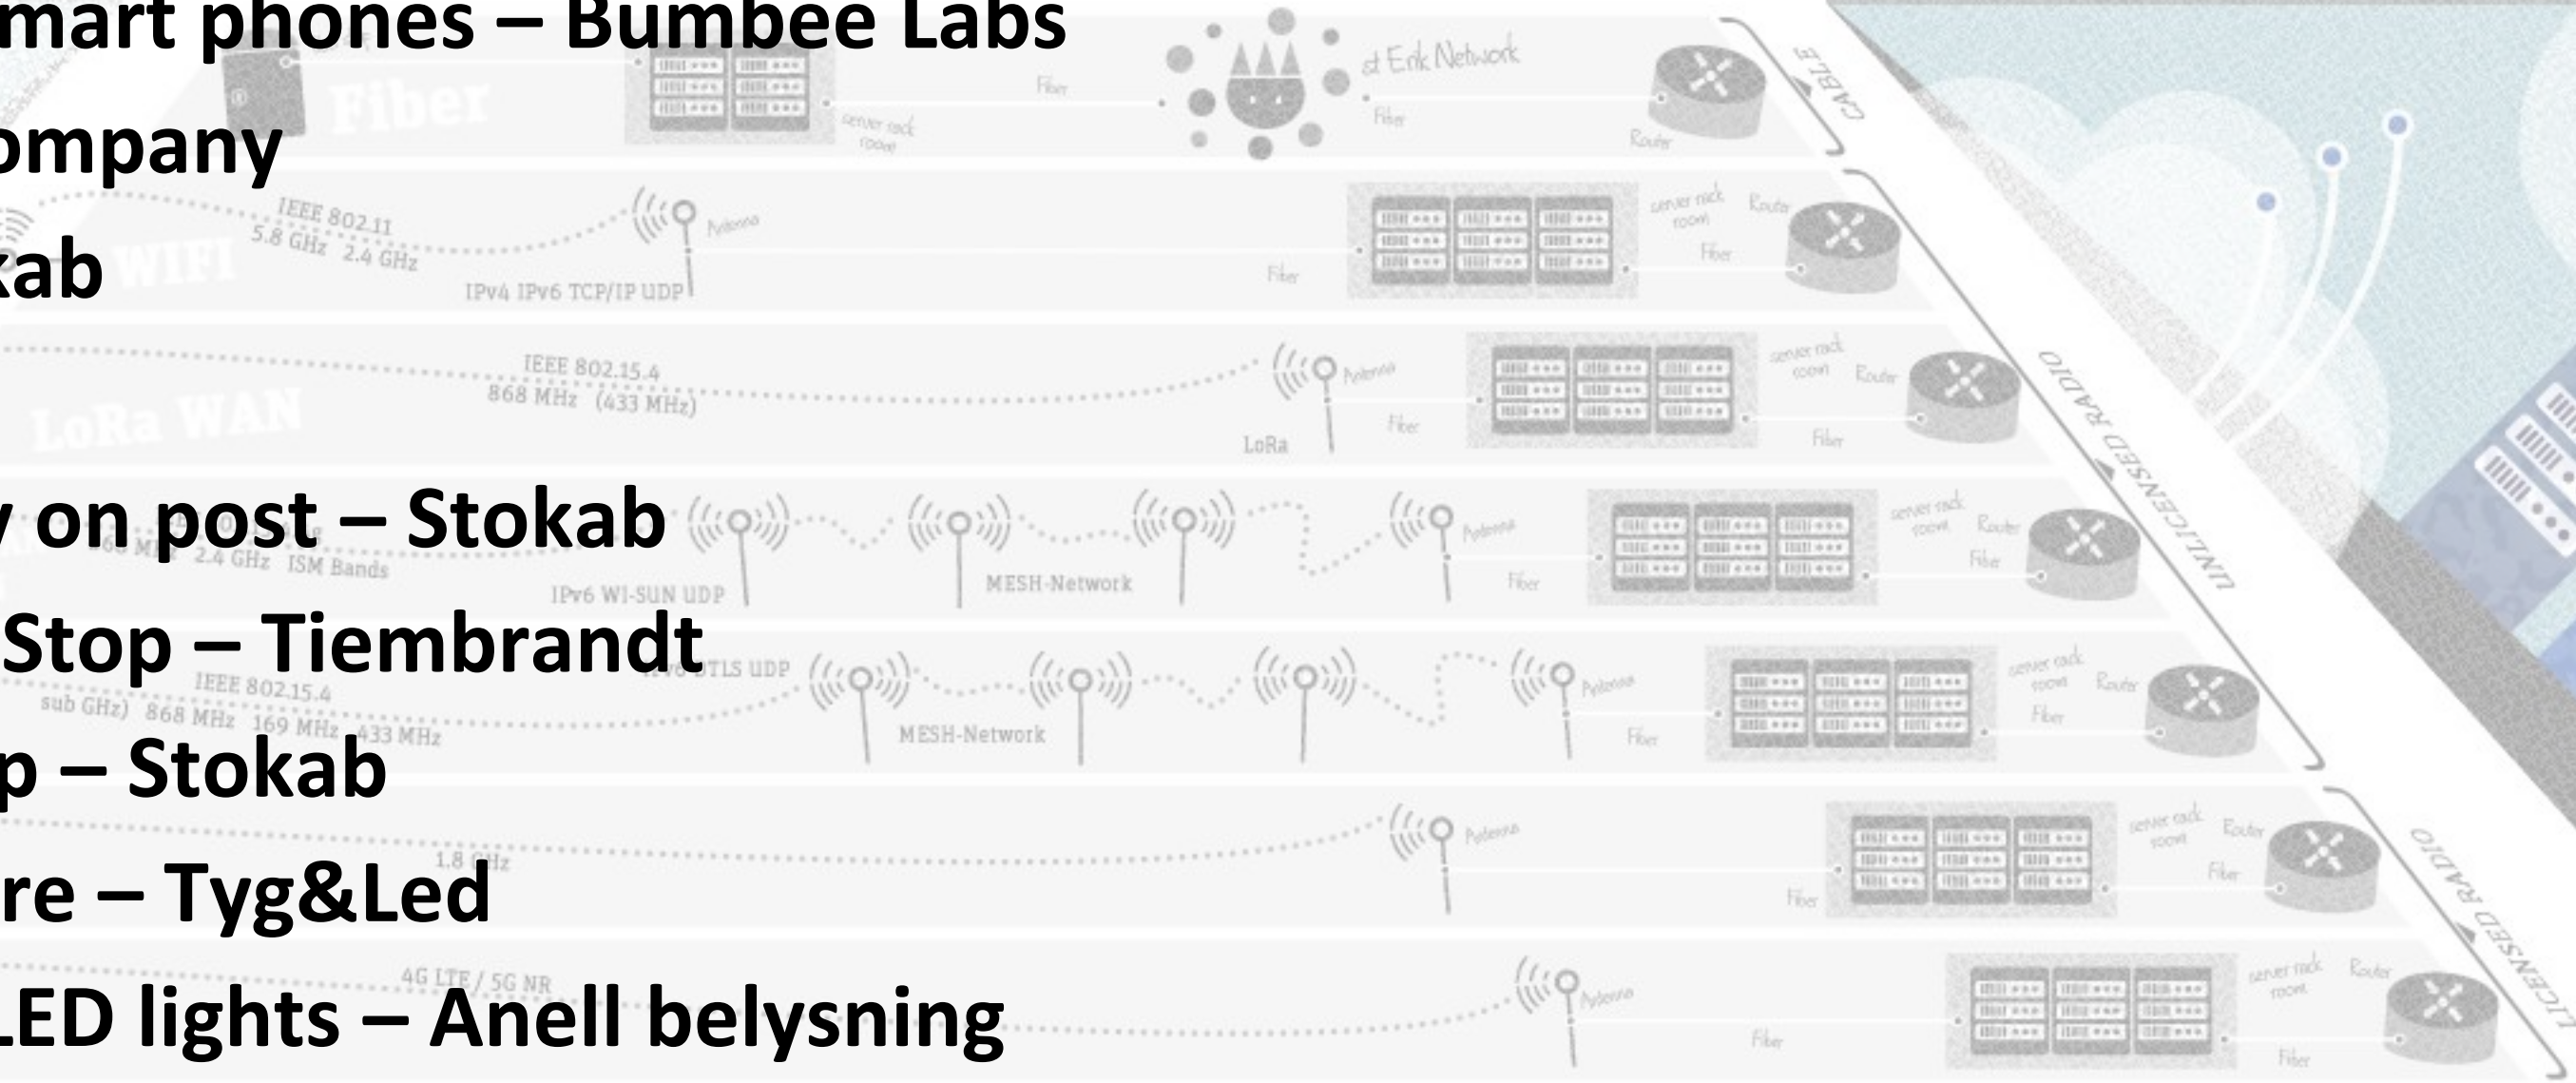

1. Fiber line with 15 stations – Stokab
2. LoRa WAN– RISE ICT/Acreo
3. 2G Open IP wireless network- KTH
4. 5G POC-Kista Ericsson
5. 5G POC Hägerstalund - Ericsson
6. 6LoWPAN - Intel/CyanConnote
7. WiFi Urban ICT Arena - Telia Company
8. 6LoWPAN - Silverspring
9. Grow Smarter comes to Urban ICT Arena – Enviroment Department
10. Kista Mobility Week –Ericsson, Nobina Tech, KTH, KSCAB
11. Hardware for positioning smart phones – Bumbee Labs
12. Narrow band IOT – Telia Company
13. Fiber between posts – Stokab
14. Hybrid cable – Hexatronic
15. Magnet ODF, Plug and play on post – Stokab
16. Digital design for New Bus Stop – Tiembrandt
17. How to retrofit old bus stop – Stokab
18. ODF contact surface for fibre – Tyg&Led
19. Develop neural control of LED lights – Anell belysning
20. Smart street lights with remote control system – S:t Erik Communication and Traffic Administration
21. Test of electronic boxes & wells with sensors that detects opening – St:Erik Communications & Stokab

## Smart City Control

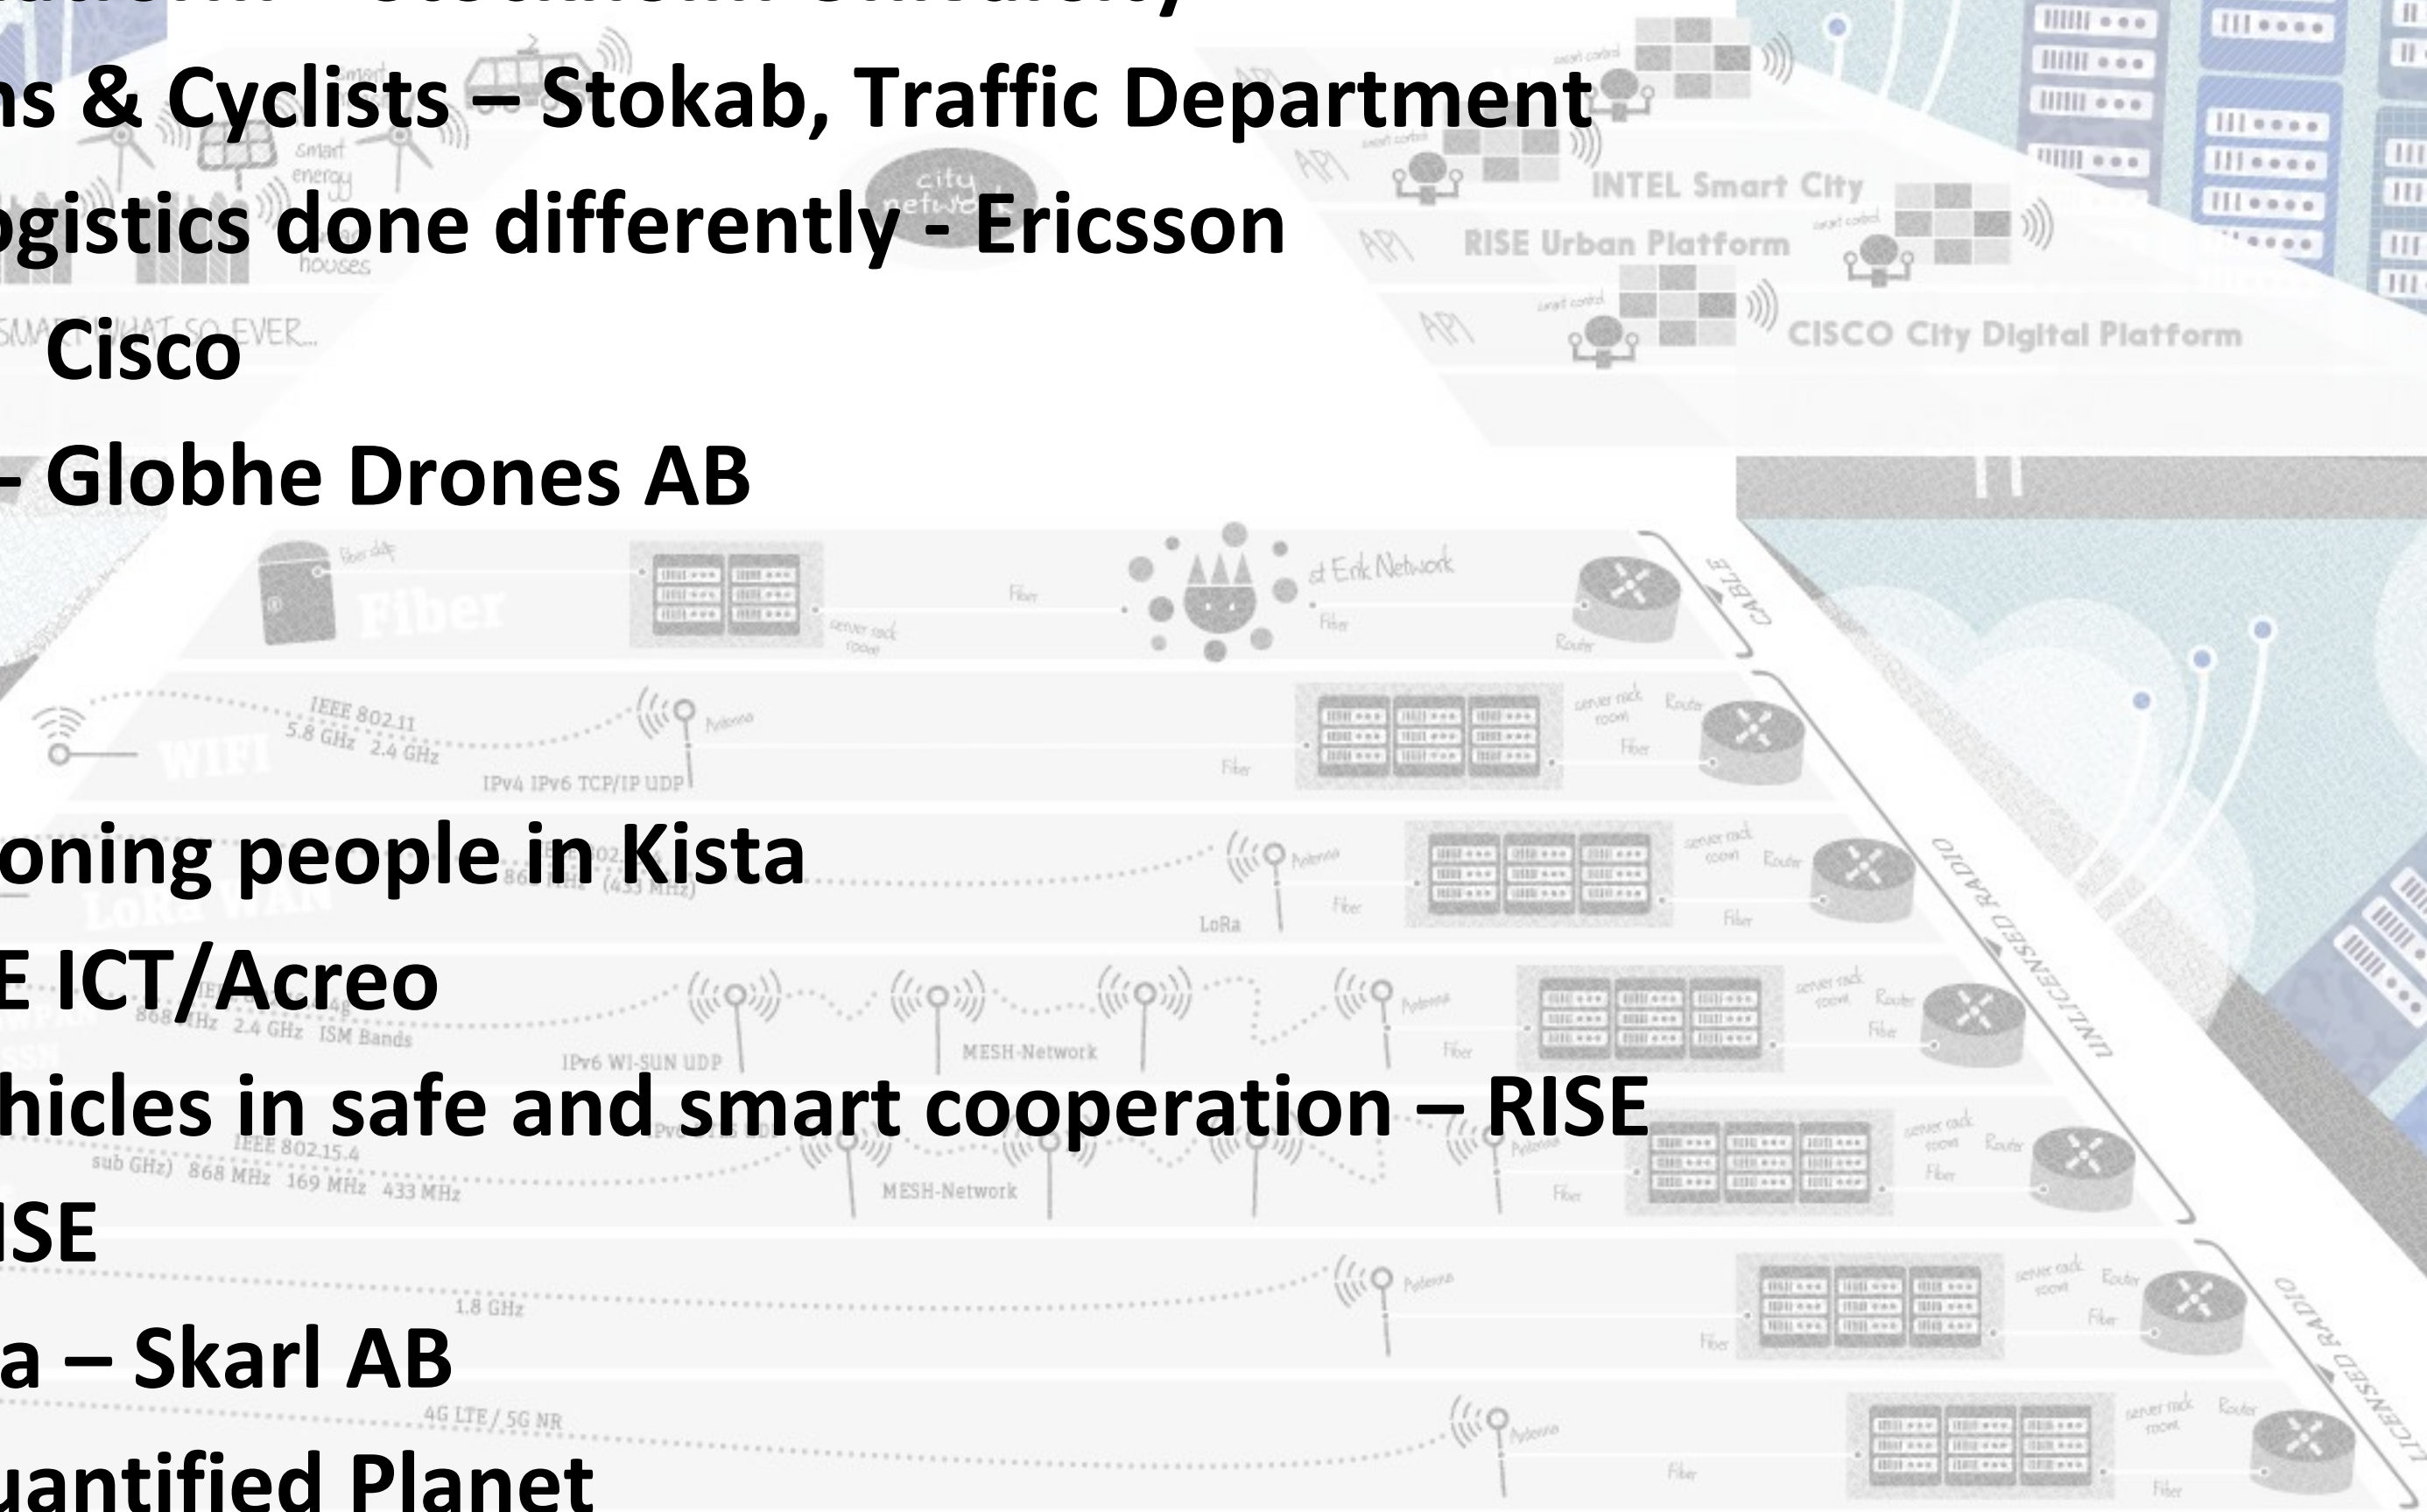

city network

1. Real-Time Analytics & Feedback for Out-Of-Home Digital Signage – SarvAI, Ericsson
2. From prototype to MVP – Map projekt
3. Smart and Connected Archives – Stockholm City Archives
4. Connected Busstop – Ericsson/Stokab
5. MediaSence Digital Platform – Stockholm University
6. Measuring Pedestrians & Cyclists – Stokab, Traffic Department
7. Urban mobility and logistics done differently - Ericsson
8. City Digital Platform - Cisco
9. No Boring Drone Lab - Globhe Drones AB
10. Bluemix – IBM
11. Watson - IBM
12. Bumble Labs – Positioning people in Kista
13. Urban Platform – RISE ICT/Acreo
14. Bicycles and other vehicles in safe and smart cooperation – RISE
15. Platform analysis – RISE
16. Streaming sensor data – Skarl AB
17. Global Goals Lab – Quantified Planet

## IoT Services

# Urban ICT Arena

1. Sjyst data! – RISE ICT, SCB, Bumble Labs, KSCAB
2. Integration of CargoBeacon to existing logistic processors– CargoBeacon, Gränges, Edsbyn
3. Video QoE in mobile networks – Agama, Ericsson
4. Expert cleaning of water surfaces – Surfcleaner, Tekniska Verken
5. Legal AI – InnovationSpark AB, IBM
6. Scorecard for monitoring QoE for digital services – Procera, Ericsson
7. Streaming sensor data – Skarl AB
8. Not Boring 5G Bike – Urban ICT Arena/Ericsson/Kista Mentorspace
9. Get hacked on demand by Bounty Kaiser – Stockholm University
10. Data collection for Global Goals – Quantified Planet
11. Sensor data from rooms – RISE Acreo
12. All you need is love –Ericsson Katzeff
13. AUTOPILOTEN – Nobina Tech, Ericsson, KTH, Klöver, SJ, KSCAB
14. GCity – Stockholm University
15. Kista Mobility Week – Ericsson, KTH, Nobina Tech

TESTBED LAYERS

## Business Models

1. NotBoring ILS Workshop – IQ Samhällsbyggnad
2. Disrupt large organizations for digital transformation – RISE ICT
3. Open Innovation for Industry Process development – TEYI, KSCAB
4. New business models for commercial screens on bus stop – Clearchannel
5. Test and analyze commercial surfaces on bus stop – Public Transportaion of Stockholm

# The Automagic City

# SMART SPECIALIZATION

Sustainable & Connected City

## Drones

## Sensors

## Cyber Security

# Drone usecases

- Smoke plyme analysis
- Find lost people
- Parking servailance
- Find a parking lot
- Evacuation support – find lost people and guide to exit
- Inspection tool – high altitude technology & vegetation
- Air particle metering on high altitude
- Transport of blood & organs
- Mapping
- Pollination
- Micro mobility vehicle
- Mobile periscope – surrounding support

# Welcome to Urban ICT Arena

*and to be not boring with us*
